Health insurance should cost less, provide more, and keep people healthier. And it can. As a non-profit, health insurance, CO-OP plan, that's what we do. We focus on people, not profits. If getting better coverage at a lower cost sounds appealing to you, you're our kind of people.

PUTTING THE CARE BACK IN HEALTHCARE INSURANCE.

Everyone in New Mexico deserves healthcare that's high-quality, affordable, and easy to access. Our network of doctors and hospitals provides NMHC members with advanced medical skills, knowledge, and care. Our goal is to help you and your family create a healthy future. And, we've made signing up easy and convenient. Talk to your broker or sign up online at mynmhc.org.

HEALTH INSURANCE FOR PEOPLE. NOT FOR PROFIT.

Finally! A really different kind of health insurance that puts people above profits. New Mexico Health Connections (NMHC) can do that because we operate like a CO-OP, not like a corporation. So we turn profits into enhanced member benefits and services, improving quality of care and holding down your healthcare costs. The health of you and your family is our #1 priority — and isn't that refreshing news?

A PLAN TO PROTECT YOUR HEALTH AND YOUR BUDGET.

Access to quality healthcare should be available to everyone. That's why we offer some of the most affordable health plans in New Mexico. And, as a physician-led organization, we're truly focused on the health of our members. Our commitment to preventive care helps keep people healthier and helps make healthcare coverage affordable for everyone.

YOUR CHOICE OF PLANS

We are committed to your care. We design our benefits and services to help you receive the healthcare you need more easily. For example, most of our plans offer a \$0 copay for:

- Generic medications for several common chronic conditions: asthma, diabetes, depression, hypertension (high blood pressure), bipolar disorder, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), coronary artery disease, and hypercholesterolemia (high cholesterol).
- Most generic behavioral health medications.
- All outpatient behavioral health visits. This also includes substance abuse treatment.
