

Oral Chemotherapy Split-Fill Program

New Mexico Health Connections members who take cancer chemotherapy drugs by mouth may be subject to a “Split-Fill Program.” In this program, members receive only a two-week supply on their first prescription fills of select oral cancer agents (drugs). The Split-Fill Program is designed to ensure that potential side effects from the medication are manageable and tolerable.

Drugs included in this program are listed below.

- Afinitor®
- Afinitor Disperz®
- Bosulif®
- Cabometyx®
- Erivedge®
- Inlyta®
- Nexavar®
